Artefacts

requirements/	Results of (RE)quirements collect/analysis.
glossaries/ glossaries.gls status.md	Glossaries for the project. Glossaries expressed in GlossaryScript. Work status.
classes/ classes.cl1 diagrams/ status.md	Class model. Class model expressed in ClassScript1. Class diagrams in different formats. Work status.
objects/ o<n>/ o<n>.ob1 diagrams/ status.md	Object models. Nth object model. Object model expressed in ObjectScript1. Object diagrams in different formats. Work status.
participants/ participants.pas status.md	Participant model. Participant model expressed in ParticipantScript. Work status.
usecases/ usecases.uss status.md	Usecase model. Usecase model expressed in UsecaseScript. Work status.
ui-tasks/ <ucname1>/ <ucname1>.kxml <ucname1>.pdf status.md	Task models. Task model for usecase <ucname1>. Task model expressed in KMade. Task model show as pdf. Work status.
ui-abstract/	Models for the abstract user interface.
ui-concrete/	Files for the concrete user interface.
ui-evaluation/ analysis/ tests/	Files for the evaluation of the user interface.
scenarios/ s<n>/ s<n>.sc1 diagrams/ status.md	Scenarios models. Nth scenario. The scenario represented as a ScenarioScript1. Scenario diagrams in different formats. Work status.
permissions/ permissions.pes status.md	Permission model. Permission model expressed in PermissionScript. Work status.
relations/ relations.res status.md	Relation model. Relation model expressed in RelationScript. Work status.
sql/ schema/ schema.sql datasets/ <n>.sql create-database.sh status.md	SQL implementation. Database schema. Database schema in SQL. Datasets Datasets in SQL. Database creation script Work status.
tracks/ tracks.trs status.md	Track model. Tracks expressed in TrackScript. Work status.
dev/ <CASESTUDY>/ status.md	Development artefacts including code. Code containing the software Development status
playground/	Space for learning, prototyping, ...
status.md	Global status of the work.
